Algeria – a market on its way to renewal and innovation

Algeria is not only well-known for being the **largest country in Africa**, but also for the predominance and state income from the oil and gas sector. The current plan of Algeria's government schedules to gain more independence from the hydrocarbon industry within the next years, means to **diversify the economy**. For achieving this purpose including the fulfillment of social demands, the current five-year investment programme includes plans to **develop the country's road, rail and airport infrastructure – resulting in great opportunities for the construction sector!**

SITP offers excellent business opportunities

Products and services presented at SITP:

- Drilling, ramming and drawing equipment, sewer construction and maintenance systems
- Compressors, compressed air and hydraulic tools
- Compacting machinery for earthworks and road building
- Machinery and facilities for concrete, bitumen, waterway and railway line construction and for road repair and maintenance
- Construction vehicles
- Construction equipment and tools
- Building site facilities
- Machinery and installations for the cement, limestone, plaster, sand, clay, gravel and ballast industries
- Machinery and installations for the recycling of building materials
- Machinery and installations for the manufacture of cement, limestone and plaster-bound construction elements
- Lifts, elevators and escalators
- Installations, machinery and equipment for obtaining and processing stone and concrete

Founded in 2003, SITP has developed into one of the region's most important trade fairs for **construction machinery and public works**. Solid numbers of exhibitors and exhibition area accompanied by **growing internationality of both exhibitors and visitors** prove the relevance of SITP for professionals and delegates from various **Algerian ministries**.
